

Clinical Research Group (KFO273)

Cellular Therapies

Symposium

University of Tübingen and International Guest Experts in Biomedical Engineering and Regenerative Medicine Invite you to Attend

When: Tuesday, March 17 (1:30 – 4:30 p.m.)

Where: CRONA Seminarraum B.220 (Ebene 4)

Translating research into cell therapy products: production of cells following Good Manufacturing Practice (GMP) guidelines according to German law

PD Dr. Melanie Hart, Dept. of Urology, University of Tübingen

Stem cell niches

Prof. Gerd Klein, Department of Internal Medicine, Section for Transplantation Immunology and Immunohematology

Paracrine actions of mesenchymal stem/stromal cells *in vitro* and *in vivo*

Prof. Wilhelm Aicher, Dept. of Urology, University of Tübingen

Biomaterial-mediated cell delivery

Prof. Jan Stegemann, Dept. of Biomedical Engineering, University of Michigan, USA

Cell-based strategies for tissue engineering

Prof. Marsha Rolle, Dept. of Biomedical Engineering, Worcester Polytechnic Institute

Refreshments will be served

In preparation of the seminar and for ordering refreshments as needed it would be very helpful if all students would register by an E-mail to: kfo273@med.uni-tuebingen.de
